Introduction: Why This Content, for This Group?

The Advanced class brings together adult students who have already consolidated their technical foundation and are pursuing the highest level of sophistication in Jiu-Jitsu, with a clear focus on competition. Unlike the foundational classes, content here isn't organized around isolated techniques, but around complete systems — each month goes deep into one family of positions, covering attacks, defense, transitions, and connections, so students build a coherent game rather than just a collection of separate moves.

The year's progression follows the logic of the modern competitive game: it starts with physical conditioning and takedowns (January), moves through closed guard and half guard fundamentals (February and March), advances into the contemporary repertoire of open and dynamic guards — De La Riva, spider, X guard, 50/50, K guard, berimbolo, and butterfly guard (April through June) —, consolidates passing and top control (July and August), goes deep into mount and back control (September and October), works on guard recovery under pressure (November), and closes the year with live competition simulation (December).

This system-based structure reflects how high-level Jiu-Jitsu is taught internationally today: not as a collection of techniques, but as interconnected blocks of knowledge that the athlete must master in depth — including their defenses and counter-attacks — before moving on to the next block.

This document serves as a reference guide for the team's instructors: each month is divided into weekly classes, with the techniques to be covered, ensuring that the Advanced class follows a consistent technical progression aligned with today's competitive Jiu-Jitsu throughout the year.
